

THE GLEICHEN CALL

VOLUME XXXI NO. 33

GLEICHEN, ALBERTA, WEDNESDAY NOVEMBER 2, 1938

SUBSCRIPTION \$2.00 PER YEAR

FINANCIAL CONDITION ATHLETIC CLUB SHOWN IN STATEMENT

Below is a financial statement of the Gleichen Athletic Club. The executive committee will take up the matter of the situation as it exists this year owing to the fact that we may be unable to get a hockey team together. Hence the bulk of the revenue which formerly came from the club will not be forthcoming this winter. It is the Club's most earnest desire to open the rink that the children may have the privilege of skating and for hockey practice in the evenings.

A general meeting of the Athletic Club will be held in the Club room on November 8th at 8 p.m. and it is hoped that a good attendance of interested citizens will be present to help solve the problem of what to do about the rink. This meeting is of interest to all parents.

Statement of receipts and expenses from Dec. 4, 1937 to Oct. 17, 1938. Cash in bank Dec. 4, 1937, gen. \$4,005 Savings

Total 11,161

Less for season 13.82

W. J. Flory, who audited the books made the following remarks:

"I hereby certify that I have audited the books and records of the Gleichen Athletic Club for the period Dec. 4, 1937, to October 17, 1938, and the statements submitted herewith are in accordance with the records submitted to me. Bank balances have been verified and found to add up to the amount on deposit with the Canadian Power Company of \$26,50. The interest accumulated on this could not be ascertained at the time of the audit. There is also interest accrued on savings, which will be added to the end of October this year."

THE WORLD OF WEAT

By M. G. L. Strange, Director of
"Crop Testing Plan"

It looks as though there will soon be three international conferences in milling.

Inspectors Will Address B. of T. Enlarged School District

The local Board of Trade has arranged for School Inspectors Frame and Sweet to address the Board at its next meeting in the Community Hall on Monday Nov. 7th November at 7:30 p.m.

The speakers will deal with the new proposed school area. As this is a matter which will vitally affect Gleichen all those interested are invited to attend this meeting and hear the subject fully discussed.

News Items of Local Interest

The Legion will stage their annual dance in the Community Hall on the evening of the 11th.

Miss McNaughton of the Blackfoot hospital staff accompanied by Mr and Mrs Ell Woods spent Sunday in Drumheller visiting relatives.

When Rev. J. W. House attempted to mount a horse the animal jumped, throwing Mr. House and at the same time the horse fell, causing him to stripur. As a result he suffered a dislocated ankle and a broken bone side bone near the ankle. Dr. Farquharson was called and attended the injured member.

The death of John McTavish, of Eustine where he had been a resident for the past 20 years, occurred on Dec. 10th at the age of 86. He was born in Bruce County, Ontario. He had lived in Alberta for the past 25 years. Funeral services were held Friday afternoon at 2:30 with Adj't. J. Sutherland officiating. Interment was made in Eustine cemetery.

studying present situation.

The Lethbridge Wheat Committee will be holding another meeting. The United States is endeavoring to arrange a conference, and now still another meeting has been called by MacEachern.

There separate international conferences will consider what can be done with the undistributed wheat surplus of the United States. Canada and the Argentine. The problem will not be easily solved, but there will be an effort to persuade Canadian and American farmers to reduce their wheat acreages. Argentina now states she will not reduce her acreage.

Operating statement for period 1937 and 1938:

Proceeds 12 hockey games \$222.55

Skating 100.00

Carnival 6.00

Total \$328.55

Wages \$170.00

Removal of snow 4.00

Lights 37.05

Repairs 36.14

Stamps66

Total \$42.20

J.W. Flory 13.82

Less for season 13.82

W. J. Flory, who audited the books made the following remarks:

"I hereby certify that I have audited the books and records of the Gleichen Athletic Club for the period Dec. 4, 1937, to October 17, 1938, and the statements submitted herewith are in accordance with the records submitted to me. Bank balances have been verified and found to add up to the amount on deposit with the Canadian Power Company of \$26,50. The interest accumulated on this could not be ascertained at the time of the audit. There is also interest accrued on savings, which will be added to the end of October this year."

Following factors have tended to raise price: Large areas in Australia now beyond cultivation; the price of wheat has risen unusually dry. Deterioration from dryness in U. S. winter wheat belt. Threshing lags in Siberia. Apparent cessation of Indian wheat exports. Heavy rain results in loss to Indian wheat crop.

Following factors have tended to lower price: Confirmation of large Romanian wheat sales to Britain. Seeding progresses satisfactorily in Italy, France and Germany. It is believed wheat production in England will be reduced. Wheat production in Persia will be larger than last year. Persian wheat to Germany, Italy and Turkey. Cutting starts in early sections of Australia. Belgian millers must increase native wheat content to 60%.

ARMISTICE DAY WILL BE HOLIDAY

A. Walker, president of the Canadian Legion will broadcast over CFCN from 10:15 to 10:30 p.m. on Friday, November 4th giving a report on the recent Dominion council meeting held in Ottawa and also, with reference to Poppy Day and Remembrance Day services. Armistice Day, November 11th has been declared a statutory holiday and all places of business will be closed.

As usual the young folks of the town spent all evening having a good time and a great number of them dressed up for the occasion. One girl dressed up as the Queen of Sheba to fill the bags they carried. Another group spent the evening hauling old wash, various pieces of furniture and other household objects onto the street, where they were left to the owners. St. Miliken's car with its 1938 plates was the most conspicuous object on the street. Mounting revealed the usual number of out houses tipped over.

When a fire bit down causing the ar to overturn, John Sinks of Calmar was working in his shack when the fire started. As he was not able to extinguish it he was barely hurt but an x-ray examination revealed the fractures. An other man riding in the car received a broken collar bone. The cause of the accident was the same as the previous one. The car had been driven by Dr. Farquharson and given medical attention. The accident happened on the main highway west of the gas leading into the home of J. G. Buckley.

All hockey players under 18 are required to register at once at MacCallum and Suttermeter's office.

Investigation of gasoline prices in this province by a royal commission appointed by the provincial government has been delayed for a time in order that departmental officials will have full opportunity to make certain inquiries concerning oil firm operations, including marketing costs and methods of distribution. The Royal Commission, composed of Mr. Justice McGillivray of Calgary, chairman, and Major L. R. Lipsett, O.B.E., of Ardley, Alberta, an authority on marketing problems, is to be assisted by Mr. J. A. Walker, while the chief consultant to the commission is F. G. Cottle, C.A., member of the provincial gas conservation board. Keen interest is expected to be shown when the commission begins its hearings.

Interest in gasoline sales is given wide scope for investigation into the spread between wholesale and retail gasoline prices. In addition to looking into various aspects of fuel oil production, the commission also is recommended what should be the price for gasoline in this province. It is also to report on the desirability of the province taking over control of distribution for marketing purposes. In view of the gasoline price reduction ordered by the fuel commissioners in British Columbia a cent or three cents per gallon being ordered, special interest is being shown in the price called for in Alberta.

Mr. Sapiro's orical ability informed the press that the new government, in organizing all its resources, will be hard pressed to meet with innumerable difficulties and objections until April, 1939, when the law comes into effect. This is coincident with the economic movement in the United States appeared in Western Canada as an apostle of pooring.

Miss Gladys E. Mandley, Canadian Professional Champion Typist

Adds further speed records to growing list of clever typists who have come to the Canadian Business College Ltd., where Miss Mandley has been Typing Instructor since June 1, 1938.

Doris Brown, entered August 29, 1938, typed 30 net October 29, 1938.

Dorothy Donaldson, entered August 15, 1938, typed 34 net, October 27, 1938.

Sylvia Richardson, entered August 29, 1938, typed 36 net, October 17, 1938.

These girls are exceptional and prove Miss Mandley an instructor par excellence.

FIRE DESTROYS FARM RESIDENCE RONALD CLARK

The community mourns the sudden death and contents of Mr. and Mrs. Ronald Clark of Cluny, situated south of the main highway on Crowfoot Creek. Mr. and Mrs. Clark had returned from Calgary the night before the fire, leaving two children home alone. At about 11 o'clock on the night of Nov. 1st, Mr. and Mrs. Clark went to the kitchen to get some water, clothing etc. A bush containing about 700 bushels of wheat, located a short distance from the house was destroyed but the neighbors managed to save about 400 bushels for the grain company.

As no insurance was carried the loss was a severe blow to Mr. and Mrs. Clark. The house a large bungalow, was built many years ago by Duncan Clark. In his racing days Mr. Clark had won many prizes at horse shows and rode horses and won many prizes at exhibitions. In this house he had large pictures of his prize winners and was proud of his won, all of which were destroyed by the fire.

ALBERTA POOL BIRTHDAY

(The Wheat Pool)

The Alberta Pool was started on August 29th, 1923, and consequently the organization is fifteen years old. These fifteen years have been eventful ones, not only for the Wheat Pool organization but for agriculture in Alberta. The first major reason for the starting of the Wheat Pool movement was the desire of wheat producers of Western Canada for a concentrated form of selling, and the operation of the Wheat Pool organization, which had been started in 1917 and 1918 wheat crops, and of the Canadian Wheat Board, which conducted the sale of the wheat crop of 1919, made a favorable impression on the wheat farmers of the prairie provinces. This was followed by the start of marketing continued. The Wheat Board ceased to accept wheat on August 16th, 1920. Heavy pressure was brought to bear on the federal government to have the federal government withdraw, but the federal government claimed it was unable to do so because of the centralized selling previously in effect was established under the Wheat Pool. The members set about to establish a voluntary selling on a voluntary basis. Their plans met with innumerable difficulties and objections until April, 1929, when the law came into effect. This is coincident with the economic movement in the United States appeared in Western Canada as an apostle of pooring.

Mr. Sapiro's orical ability informed the press that the new government, in organizing all its resources, will be hard pressed to meet with innumerable difficulties and objections until April, 1939, when the law comes into effect. A Lesson From Europe

If the recent crisis in Europe has taught Canadians anything, they must surely have learned the value of unity, in which it is truly said, lies strength. The fate of Czechoslovakia in the past few weeks has demonstrated to the entire world the truth of the old adage, "United we stand; divided we fall."

There is no gainsaying the statement that had it not been for internal dissension, the elements comprising the population of Czechoslovakia, Hitler would have had no good ground for taking the state which have resulted in the dismemberment of the 20-year-old central European democracy.

Indeed, as far as we say, the members of racial minorities, Czechoslovakia's would have had an isolated entity today had the views and aspirations of these minorities been welded into an homogeneous whole with those of the Czechs and Slovaks themselves.

Had it not been for the dissension within the Czech-Slovakian borders the German chancellor would have had no reason for intervening that would stand the test of public opinion, and likewise Chamberlain of Great Britain and De Gaulle of France would have had no reasonable excuse for acceding to Hitler's demands, nor would he have had the support of their constituents at home in so doing.

It would be well for the people of Canada, secure though this country may seem from "outside" interference at the present time, to heed the lesson which may be learned from history as exemplified in the partitioning of Czechoslovakia, and to remember that a house divided against itself is destined to fall sooner or later.

While there may be little reason to fear serious division in the country on racial lines, there is a danger of ideological differences becoming accentuated unless a spirit of tolerance permeates the views of the people in different sections of the country. The growth of political, economic and social cults and "isms" sometimes leads to serious divisions in viewpoint and may culminate in revolutionary decisions and actions, unless the greatest effort is made to stamp them from an attitude of clear reasoning and patient sanity.

Apart from these differences in ideals and ideas of a political, economic or social character, Canada faces other difficulties which must be overcome if the foundations upon which our people were built at the time of Confederation are to endure and this country is to take its place in the sun as a virile, powerful and happy national entity.

These difficulties, not necessarily insurmountable, were recently enumerated by Dean F. C. Crunkin of the University of Saskatchewan, addressing a session of the Canadian Institute of Public Administration, and some changes are needed in the uniting of the people, as follows:

The Maritime problem occasioned by dissatisfaction of the Maritime provinces with Confederation; the geographic problem due to the immense area and unfortunate geographic divisions; the difficulty of district regional economies typified by the agricultural versus industrial east; conflicting racial philosophies in the west; in the neighboring provinces of Quebec and Ontario; and, finally, the financial ascendancy of Ontario, where the great bulk of the nation's wealth is at present concentrated.

Patience Is Needed

One has only to read the history of man to perfect unity to realize the immensity of the problems which has to be solved if this youthful nation is to realize the vision and ambitions of the Fathers of Confederation. This can be achieved to the full but only by the exercise of courage, clear thinking and a determination to reach the goal by the safe and sane methods which experience has taught are the only assurance of ultimate success.

It is to be hoped that the present Canadian government will be able to relate when it reports its findings, will be able to point the way to a successful solution of these problems, and in the meantime a little patience must be exercised. In anticipation that this hope will be realized before very long.

United States Quota

Canada Has Not Yet Supplied Full Amount This Year

The United States quota for Canadian cattle for 1938 will permit entry of 155,700 cattle of 700 pounds or more, 51,833 calves of less than 165 pounds and 1,000,000 dairy cows. To September 3, Canada had supplied 34,010 head or 21.3 per cent of the heavy cattle, 32,610 head or 80.8 per cent of the calves and 4,486 head or 40 per cent of the dairy cows. By August 28 of last year, the quotas of both the heavy cattle and the calves had been filled and that of dairy cows 20 per cent used up.

No newspaper reporters were present when the Wright brothers first flew, and when the story finally did reach the newspapers, very few people believed it.

Education And Workers

Persons Living In Prairie Provinces And Their Classification

Persons living in the prairie provinces with less than a high school education are found chiefly in agriculture and in semi-skilled and unskilled occupations. The Dominion Bureau of Statistics reported in a census bulletin:

Clerical and kindred workers and skilled artisans include a larger proportion of persons having a high school from nine to 12 years or, roughly, with a high school education. Those with 12 years or more of schooling, most with college education, are engaged largely in professional and other clerical pursuits.

Almost two-thirds of the persons reported less than nine years' schooling. Only about two-fifths of females fell in the same class.

Had To Get Home

For six days Ralph Pastatia lay semi-conscious at the base of a 30-foot cliff from which he had fallen. Then the 58-year-old man recovered and crawled from the rocks to crawl to a neighbor's home. Taken to hospital at Olympia, Wash., Pastatia declined to remain there, explaining he was away behind in his farm chores.

Make Good Citizens

The more one talks with Canadians who come from German or Italian stock, the more one is led to realize that while these people love the people and culture of their origin, and rightly so, they regard with abhorrence the political creeds which are now in ascendancy in Italy and Germany.

Equal In Last Analysis

But Girls Can Taste Their Food Earlier In Life Than Boys

Age for girls, girls have more teeth missing, filed or decayed than boys. It was concluded in a report on a United States Public Health Service study.

This is not simply because they are girls, according to Dr. Harry Klein and Dr. Carroll E. Palmer, who made the study, but rather because a girl's teeth grow earlier in life than a boy's and have therefore been exposed longer at the same age to wear, tear and germs. In the last analysis, however, the girls show greater susceptibility to dental decay than boys.

Continuing their dental studies with students attending the municipal elementary schools of the small urban community of Haigerton, Minn., the doctors gathered the present data from examinations of 2,252 boys and 2,184 girls.

Canada's First Moslem Church

Model Structure Of Bektch Worcester To Be Built In Edmonton

The First Moslem church in Canada will be at Edmonton. The building permit says the owners will be Abu Bakr and Abu Umar.

It will be a modest one-story 30x30 structure of brick veneer on 10th Avenue. It will be striking to find if the congregation are all Arabs as they will cover a number of nationalities, of course, even in Great Britain, there have been substantial conversions to Islam and they have their mosques, too. It is estimated that 1,000 people will be housed here.

"I used to get very bad headaches," said Kruschen, "and I could never find out what caused them. One morning, casually, I tried Kruschen tablets. I took one tablet, I continued taking it, but I have not had one of those awful headaches since. I don't know what caused them, but I'm glad I found it. I find it very good."

(Mrs.) L.A.W. — "Kruschen Salts can nearly always be traced to sluggishness of the kidneys, liver and intestines, and to the accumulation of waste material which stagnates the blood." The salts are said to stimulate the internal organs to healthy regularity so that no clogging waste is deposited in the colon. Kruschen Salts keep clean and serene. And that is why Kruschen Salts brings health and lasting relief from headaches.

To Restore Eyesight

People Are Urged To Will Their Eyes To Science

Persons are urged to give their eyes to science in order to restore the sight of others, it is being urged.

Dr. Ramon Castroviejo, of New York City, author of the proposal, said the eye surgeon frequently can bring back the sight of persons who have lost their sight through accident or disease.

In many cases, however, the tiny pieces of cornea tissue necessary for grafting a new window into the eye are not available.

Such tissue can be obtained from the eyes of stillborn infants or from corpses if the operation is done soon after death, Dr. Castroviejo said. The latter source is the more reliable, he added.

It is possible to preserve the eyes in usable condition for several days, he explained. Thus it would be possible to keep a supply on hand in the hospital refrigerator and to coordinate a number of operations with that supply.

Described In One Word

Easy To Tell What President And Dr. Dafee Are Doing

Dr. Dafee went to Washington to visit the White House. Although Dafee had been allotted a five-minute wait he was closeted with the President for almost half an hour.

When he emerged, his publicists tried to ascertain what had been the conversation, to deliver it to the press for exploitation. Dafee refused, insisting that it was extremely confidential. After lengthy pleasantries, Dr. Dafee presented his plan to the President, who responded, "Good, Canada tell me about it?"

"One word," replied Dafee. "Babies."

Leaf beetle larvae get fresh air to breathe several feet under water by thrusting their heads into the air spaces of lily stems.

The leaf beetle's note sometimes is so loud that it can be heard a mile away.

In Siberia, in 1908, wind from a meteorite blew down forests over an area of 100 square miles.

About 7,000 persons are drowned in the 10,000 lakes of the United States each year.

Make Good Living

Progress Made By Denmark Farmers

1758-1938, 175 Years

In 1758, stated the Montreal Gazette, the peasants of Denmark won their freedom from the old system of villeinage under which they were little better than workers for the great landowners. This year the Danish and other European nations are celebrating the 150 years of liberty and discussing with justifiable pride the progress that has been made in the last century and a half. After the breaking-up of the estates, the land was divided into farms, small as compared with the farms of North America but astonishingly productive and self-supporting for the family.

Agriculture is the primary activity and Danish products find favor in the British and Continental markets. Exports of bacon, eggs and hams, cheese and butter bring wealth to the Danes on the land and there is a constant effort to retain the foreign markets.

The average farm is 15 acres and the average farmer owns 100 acres of all the land. With a half dozen or more cows, a couple of score of pigs, a horse or two and many hens, the family makes a fair living on the land and also provides most of the food for the animals.

This is indeed a strong and intelligent farming to which the government lends every encouragement in the way of loans, which are given on liberal and intelligent terms.

There is no fixed interest rate for these farm loans, the practice being to charge a fair rate when crops are good and a low rate when they are poor or non-existent.

Through the co-operative societies which have reached a high state of efficiency in Denmark, marketing of products at home and abroad is a common and easy matter. The farmer also buys his seed at the same co-operatives and is quite satisfied with his returns.

There being no coal in the country, dependence is on agriculture rather than on mining and manufacturing.

The government, accordingly, concerns itself chiefly with bringing about farm improvements and with reclaiming marsh and wetland land.

For the beach areas where trees are cut another is planted with a view of maintaining the wood wealth.

The 200,000 farmers in the population of 3,000,000 or thereabouts are doing well and have the liberty to work for themselves that was won in 1758.

A machine for locating thunderstorms and reporting them by radio, has been perfected at the Melbourne University, Australia.

The average life span of a tourist is approximately a hundred years.

A barrel of crude petroleum yields about twice as many gallons of gasoline today as it did 15 years ago.

All over China written Chinese is the same, but every province, or even district, has a different pronunciation.

For #4 Years Vick's Advertising has been passed upon by a Board of Physicians.

IT CLEARS UP A STUFFY HEAD FAST!

The Utah Salt Flats

Extend For 200 Miles And Surface Is Very Hard

The salt flats near Salt Lake City, where John Cobb set up a new world land speed record only to lose it a day later to Capt. Eyston, form a vast amphitheatre 200 miles in extent. The surface is so hard that nothing can penetrate it, not even a bullet shell can be driven into it. This salt is, however, quickly cut into furrows by heavy cars travelling at high speed and has to be levelled by scrapers as the car has passed. Mr. Cobb is a fur broker in London. Speed driving is his hobby.

Many a man's future is no further away than the front of his car.

CHAPTER V.—Continued

"Once we find that old river bed," he said. "But where will you find it?"

"That's the problem. There's nothing to indicate where it might be. We're sure it's there somewhere. But that's all we know."

"We're just looking for the proverbial needle."

"Just about," Jack agreed. "We'll just have to keep on putting down test holes; one of them may turn out."

"Isn't that rather silly?"

Hammont shrug his shoulders. "All we can do is follow Joe's lead—wherever he goes—but I suppose other persons might go at it scientifically."

"And what were they looking for?"

"Perhaps."

"Then why don't you?"

"You don't know Joe's belief. They distrust scientists. Any old prospector will tell you that an engineer or geologist can ruin the mine ever discovered. Oh, they're funny!"

Kay tossed her head.

"I can see that you're funny about it. Why should you give up a thing in life just because your father—or who do you call it—brought it up?"

"It's his partner, Kay! We've fought the North together."

"That's carrying triflery too far. You'd both be better off with scientific help."

"I suppose we would. May I, I couldn't sell Joe that idea in a month of new moons. And he'd rave if he found out that I went after advice myself. Besides, where would I go—where I knew I could be safe?"

She looked up.

"You haven't thought of Bruce Keating?"

Hammont's eyes widened.

"No, I hadn't."

"My father trusted him for years and wasn't sorry. He did all that work down there. Fred and Bob were his side-bitten. They would be penniless now if he had listened to Bruce." Again there was silence. At last Kay clenched her hands and walked to the ledges. Slowly Jack followed, drawn by the sound of her in the moonlight. "I wish I could talk to that partner of yours."

"You've changed your mind when you look at me. Right as well as argue with a tree stump?"

"But why bother with him?"

"Kay! He's my partner."

"Oh, I didn't mean that. Why not get you to go to him? Know where you're going, instead of staggering around blindly. Doesn't it amount to just that?"

"It seems guidance would help both of us. A geologist could advise where that river ran a thousand years ago."

Hammont spoke slowly. "Maybe that's an idea, Kay."

"Are you coming back to the mine, Father?" "As for the fee, I see that he doesn't charge you anything until after everything is over." She laughed. "He'd better know. I'd slay him if he put in a bill."

"McKenzie Joe would have to stay in the dark. He'd kick over the traces."

"Tell him anything? Look here, you're digging now at random, aren't you?"

"Just about."

"Then couldn't you just accidentally dig where Bruce told you to look?"

"That's an idea too!"

"Then why don't you? You owe it to yourself. And Joe? He'd benefit as much as anyone else. You could think of little except that she was close to him, vibrantly warm, that her hair brushed his cheek, that a soft hand stroked his throat."

"The coldly appraising look in McKenzie Joe's eyes halted him.

"What crooked mining shark has been telling you the wrong place to dig?" he asked irritably, and walked on toward Jeannie's cabin.

The coldly appraising look in McKenzie Joe's eyes halted him.

ed, in a smothered voice. "We've been got, we'll wait, that's all."

"How long?"

"They were close to his. Until I make some money out of that place. Oh, it's a subterfuge, I know. But at least I'll bring you something besides myself — something I've earned."

"But you can't work that claim with your own hands."

"You said you'd get me some more."

"That takes money."

"I've got a little. A few hundred dollars. That will be enough. Bruce gives me a little to live on—because of Father."

"But suppose you don't hit it?"

"She raised her head, chin high in the moonlight.

"I want to hit it. I want to have you in my pocket."

"Jack Hammond went down the hill that night with the lips of nobility. A man with money, a man with influence that he should have faced moments of doubt—all that was now dispelled.

A few nights later, as McKenzie Joe scraped the sandy mud off his coat and prepared to start for Jeanne's cabin, he took a tin of tobacco. Jack Hammond came out of the semi-darkness of the cabin and leaped against the doorway.

"Listen, too," he began. "I've been thinking about something."

"Yes?" the old prospector tossed aside the mud-smashed stick and stood waiting.

"We've been looking for that old riverbed," he said. "I've been pretty haphazard."

"Have we?" asked Joe. "We've dug a hole and a hole there, and a hole in the dark. I've been thinking that we ought to map out a campsite. Suppose we swing away over to the right, almost to the end of our trail? Then we can start putting down a series of test holes. Then, if those don't work out, we can start swalloping across the valley."

The coldly appraising look in McKenzie Joe's eyes halted him.

"What crooked mining shark has been telling you the wrong place to dig?" he asked irritably, and walked on toward Jeannie's cabin.

"That's an idea too!"

"Then why don't you? You owe it to yourself. And Joe? He'd benefit as much as anyone else. You could think of little except that she was close to him, vibrantly warm, that her hair brushed his cheek, that a soft hand stroked his throat."

THE OLD ORDER CHANGETH

How far back can you remember—twenty?—thirty?—forty?—fifty years? Even if it is only ten years you can still say: "Things were different then!"

Change flows over the face of everything, sometimes imperceptibly as a rising tide, sometimes with the swift, remorseless fury of a tidal wave. Many of us have seen the far-reaching transformations wrought by war and economic breakdown.

Change is inevitable; it is a law of life. But in the life of a people it has to be controlled. It needs a balance wheel to steer it to the path of progress; and it has a balance wheel in the weight of an informed public opinion, made possible by a free press.

Newspapers are the control of every national or local movement in the hands of the people by submitting all the news to their scrutiny and judgment. The precipitancy of the few is restrained by enlisting the interest of the many.

There will be changes in the years to come. To help you play your part in shaping them into progress, keep in touch with the news. Be informed.

ALBERTAPOL

attempted to build elevator systems in order to render the best possible service to the membership. In 1929 Mr. Alberta Pool had three counter elevators in operation. Today it has 2000 counter elevators with a capacity of one million bushels, and own and operate

16,300,000 bushels and a modern terminal at Vancouver with a capacity of 1,500,000 bushels. It also operates a terminal at Lethbridge, a terminal at Medicine Hat, and a terminal at the port of Vancouver with a storage capacity of 1,650,000 bushels. The three pools own a total of approximately 1,850 counter elevators with a capacity of 60 under lease, terminal capacity of approximately 38 million bushels.

The western pools encountered their first difficulty when the world harvested a record crop in 1929 and Canada produced 66 million bushels

under lease, terminal capacity of approximately 38 million bushels.

For the construction of these elevator systems the government assumed a substantial portion of the loss sustained by the Manitoba Pool and a similar plan was followed in the other two provinces.

In the intervening years up to the present payment of principal and interest have been paid quarterly by each pool organization.

Town & District

LADIES S.C. GROUP HOLD MEETING

The first meeting of the year of the Meadowbrook Social Credit Group was held last Thursday afternoon, at Mrs. Kenneth McPhee's home with twenty members and their husbands in attendance. Neilson, the president, occupied the chair and called the meeting to order with the Theme Song. Mrs. Bell, the secretary, reported on the meeting held on Oct. 14th at the Meadowbrook hall and on other business coming before the meeting.

The credit house system was discussed and other items of interest concerning the government, also news concerning general topics which are very important to us. A very fine paper entitled "Hallowe'en" written by Mrs. Fred Hamar of Chilliwack, B.C., was read. This paper was written by a woman who was in residence in Mrs. Hamar had moved away. The paper was greatly enjoyed by the members and they wish to express their thanks for it, and to Mrs. Fanny McPhee for remembering to bring it to the meeting.

Mrs Sadie Davidson, of Idaho, sister of Mrs. Claude Rousche, was a visitor to the meeting and the members enjoyed hearing her very much and hope she will return again.

For entertainment, Miss C. Wilson, sponsored a very unique contest and the prize was carried off by Louise Moore.

Those present adjourned and Mrs. McPhee assisted by Mrs. Pierard served a very dainty tea. You can't you are too blind and sensitive. Little scratches break your heart. A letter of complaint comes in from some customer and you take it as a personal criticism, even though it may be brought over by someone else. You hear that someone is making more money than you, and immediately all fair fields look greener. You are a fairly useful cog in your present job, but might easily be replaced and would lose you. But you will never hold a big job until you can forget your own petty self and learn to laugh when the world takes a crack at you. Hanged if I don't think sometimes it might be better if we were to get out and try your hand somewhere else."

One evening last week a large number of friends from Gleichen and District gathered in the Canadian Legion hall to celebrate the 25th wedding anniversary of Mr. and Mrs. Robt. Haskayne. A very pleasant evening was spent in dancing while the ladies prepared supper. After supper, Mr. and Mrs. Kelly sang a very appropriate song while two members of the Hirtle Orchestra also gave two numbers. Mr. Colin Park of Carseland also entertained with a solo. At the end of the program Mr. Haskayne, with a beautiful cedar chest and Mr. Haskayne with a pen and pencil set. Mr. Haskayne suitably implied and the quality of his speech garners him from the music unit considerable popularity. He was also taken to make a presentation to Stan Haskayne, who has recently left the district to start a business for himself in Bassano. The music for the dancing was very capably supplied by the Hirtle orchestra of Stratton.

On November 1st, 1938

Mr. and Mrs. J. Boijer of Gleichen will be married. The bride is a widow of the late Captain Floris Boijer who died in 1936. The wedding will be held at the Gleichen United Church on Saturday, Oct. 29th.
